

Back To The Queer Future #7: STAR Search

Marsha and Sylvia have 4 friends who each live in a different apartment building near the intersection of two roads. Their friends have provided a map showing all their apartment buildings, plus the building Marsha and Sylvia are looking for, but have somehow failed to mark which building is which!

Fortunately, Marsha and Sylvia remember a few things about where their friends live:

Stormé lives farther north than Victoria, who lives farther west than Bunny

Lee lives further south than Bunny, who lives further west than Stormé

Victoria lives further north than Lee

Bunny has to cross the street to visit Lee

Which number building is the apartment block they're looking for?
